

Project Executable Files

Project Name: ComicCraft – AI Comic Story Creator using Gemini Models

Academic Year: 2026

Submission checklist and run information.

S.No	Item	Status
1	Complete source code	Included in submission package
2	README / Setup Guide	Included
3	requirements.txt	Included
4	Database schema / seed files	NA – no database in current implementation
5	.env.example	Recommended to add before final submission; do not submit a real API key
6	Deployed application URL	Not provided
7	APK / executable binary	NA – web application
8	Dockerfile	Not included
9	Test files and results	Test documentation included; benchmark results pending
10	Demo video / walkthrough	Not provided

Run Instructions

1. Install Python 3.9+.
2. Open the comiccraft folder.
3. Create a virtual environment.
4. Install dependencies with `pip install -r requirements.txt`.
5. Create a .env file containing `GEMINI_API_KEY=<your-key>`.
6. Run `streamlit run comic_app.py`.
7. Open the local Streamlit URL shown in the terminal.

Known Limitations

No persistent database; final comic artwork workflow is not fully persisted; model/API availability and quotas can affect generation; no hosted URL was supplied in the archive.
