

Communication

Project Name: ComicCraft – AI Comic Story Creator using Gemini Models

Academic Year: 2026

Project communication points for presentation and evaluation.

30–60 Second Project Pitch

ComicCraft converts a simple story idea into a five-panel comic story using Google Gemini. Each panel includes a scene, character action, dialogue and image prompt, while the prompt design asks Gemini to keep characters consistent. The application is delivered through a simple Streamlit interface and the generated story can be downloaded for further use.

Key Points to Explain

Problem → Users have ideas but may lack comic-writing/storyboarding skills.

Solution → Structured five-panel Generative AI workflow.

Technology → Python, Streamlit, Google Gemini, Google GenAI SDK.

Value → Faster ideation and a ready-to-illustrate comic script.
