

Code Layout, Readability and Reusability

Project Name: ComicCraft – AI Comic Story Creator using Gemini Models

Academic Year: 2026

Assessment of the submitted ComicCraft source layout.

```
ComicCraft/  
■■■■ comiccraft/  
■ ■■■■ app.py  
■ ■■■■ app_backup.py  
■ ■■■■ comic_app.py  
■ ■■■■ comic_story.txt  
■ ■■■■ requirements.txt  
■ ■■■■ ui.py  
■■■■ ComicCraft_Project_Report.pdf  
■■■■ README.md
```

Observations

The primary Streamlit implementation is `comic_app.py`. Supporting scripts demonstrate alternate or earlier UI/CLI implementations. The project uses clear function naming for image generation, page configuration, story generation and panel handling. The requirements file isolates the main Python dependencies.

Recommended Cleanup

For a final submission, keep one clearly identified entry point (for example `comic_app.py`), remove obsolete backup/duplicate scripts if they are not required, add a `.env.example` without real secrets, and document the exact run command.
