

Performance Testing

Project Name: ComicCraft – AI Comic Story Creator using Gemini Models
Academic Year: 2026

Performance test plan. No measured benchmark results were supplied in the project archive, so actual values are left as not measured.

Field	Details
Testing Tool Used	Not supplied in project archive; recommended: Locust or k6
Type of Testing	Load / response-time testing
Target Module / API	Comic story generation request
Test Environment	Local or hosted deployment
Test Date	To be recorded during execution

Test Scenarios

S.No	Scenario	Virtual Users	Duration	Expected Outcome
1	Single-user generation	1	60 sec	Successful generation without application error
2	Light concurrent load	5	120 sec	Stable responses and low error rate
3	Moderate concurrent load	10	120 sec	Service remains usable; API quota limits documented if reached

Performance Results

Metric	Target	Actual	Status	Remarks
Average response time	Measure and record	Not measured	Pending	Gemini response time varies by model/API load
Maximum response time	Measure and record	Not measured	Pending	Record during load test
Throughput	Measure and record	Not measured	Pending	Depends on API quota and deployment
Error rate	< 1% target	Not measured	Pending	Record 429/503 and application errors
